DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of Species III in Paper No. 8 is acknowledged.

Claim Objections

Claims 20-32 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim should refer to other claims in the alternative only. See MPEP § 608.01(n). Accordingly, the claims 20-32 have not been further treated on the merits.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) do not apply to the examination of this application as the application being examined was not (1) filed on or after November 29, 2000, or (2) voluntarily published under 35 U.S.C. 122(b). Therefore, this application is examined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1, 3, 4/3-15/3, 33-49/33, 51, 53, 54/53-66/53 are rejected under 35 U.S.C. 102(b) as being anticipated by Gough et al. '229. In figure 8, Gough et al. disclose a probe for deploying electrode arrays comprising a shaft (18) having a distal end and a proximal end, a first array of electrodes (16) extending from (18') and a second array of electrodes (16) extending from (14) each having a concave face that is opposed to the other when the arrays are deployed. In figure 4, Gough et al. disclose the method steps as claimed.

Claims 1, 2, 4/1-15/1, 51, 52, 54/51-66/51 are rejected under 35 U.S.C. 102(e) as being anticipated by Jones et al. '832. In figures 23-25 Jones et al. disclose a probe for deploying electrode arrays comprising a shaft (108) having a distal end and a proximal end, a first array of electrodes (102) and a second array of electrodes (100) each having a concave face that is opposed to the other when the arrays are deployed.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 16-19 and 49/16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gough et al further in view of Burbank. Gough et al. teach all of the limitations of the claims except the concave faces of the electrode arrays facing each other. Burbank discloses an electrosurgical device that includes two concave arrays

with the concave faces facing each other. The concave arrays of Burbank provide a means of anchoring the device in the treatment tissue. Therefore, it would have been obvious to one having ordinary skill in the art at the time the invention was made to rearrange the concave faces of Gough to face each other as taught by Burbank to enhance the devices ability to anchor itself into the tissue being treated.
